

- **ADCOR Packaging Group, LLC**, was created as a sister company of ADCOR, the OEM of Crown Fillers, as a direct response to our customer's need for a qualified packaging systems integration provider. Partnering with some of the best and most reputable manufacturers in the industry (AMT, GC Evans, SE&M) we have formed a group with the core ability to provide single source capabilities for any packaging needs – from a filler infeed to a complete turnkey bottling line – for the beverage industry.

ADCOR Packaging Group works seamlessly within our organization to provide our customers with total line design capabilities, as well as project management and installation supervision. We manufacture and recondition fillers and process systems, as well as our products listed below, to deliver complete turnkey operations.

- **Pallet Conveyor**
- **Palletizers**
- **Electrical Controls**

SERVICES

- **Complete Line Design and Integration**
- **Project Management**
- **Mechanical Installation**
- **Electrical Installation**
- **Start-up and Commissioning**

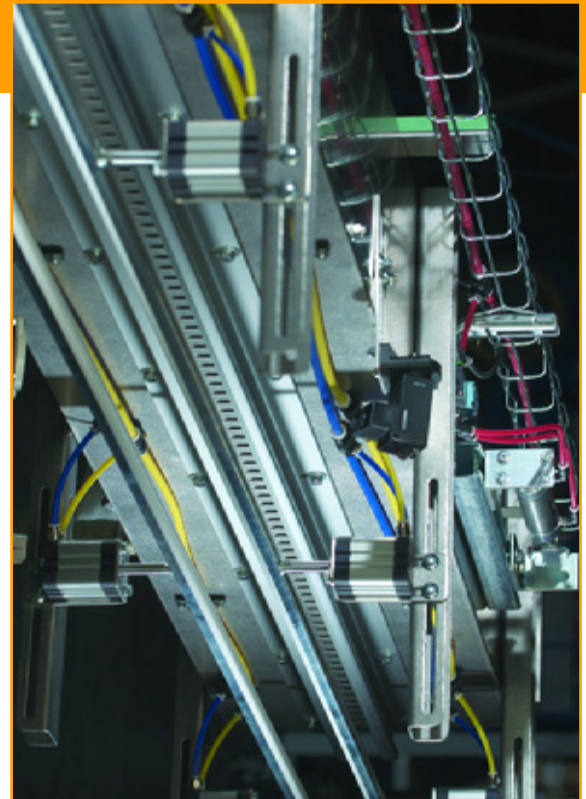

Strategic Partners

AMT – One of the world's premier manufacturers of air conveyance systems. Specializing in complete downstream systems including Single or Multiple Lane Conveyance (Air, Tabletop, and Mattop), Offline Storage (Hoppers and Silos), Palletizing, Full Pallet Conveyance, Electrical Controls, as well as Turnkey Installation Service.

G.C. Evans has been a supplier of superior quality stainless steel processing and material handling to the food and beverage industries for over 65 years. Only the highest quality materials and sub-components are used in G.C. Evans equipment. Our insistence on top quality engineering and quality fabrication results in reliable, low maintenance equipment, that minimizes costly down time for our customers. Our "made in U.S.A." label and history of on-time delivery brings satisfied customers back to G.C. Evans time and time again.

SE&M is an innovative company dedicated to develop custom solutions for material flow or manufacturing process improvements by supplying consulting, project management, and prototyping through final customer acceptance. SE&M possesses an in-depth and wide array of experience in conveying and parts handling applications. This experience includes; initial layout, project management, engineering design, manufacture, installation, and commissioning of projects of all sizes. From food & beverage to automotive piece parts to assembly station lines to pallet handling, SE&M has the expertise to bring your project to your desired conclusion. SE&M can also provide programming and integration services in addition to, or along with the material handling solutions mentioned above.

No job is too big, or too small for ADCOR Packaging Group LLC. Next time your organization has a need, please contact ADCOR and put the **speed of innovation** to work for you.
